Xquip, a subsidiary of Xtenders, is a Dutch design company specialized in carbon fiber superyacht equipment.

Xquip designs and produces customized, durable and lightweight carbon fiber solutions that contribute to the usability and appearance of any superyacht.

**INTRODUCTION**

**XQUIP**

**THE ULTIMATE CARBON SUPERYACHT EQUIPMENT**

**EXPERIENCE**

With a background in high-performance yachting, Xquip's founders have developed a clear vision and understanding of the industry trends and developments. Over the years, our designs have evolved by working alongside numerous superyacht shipyards and owners.

Together with our in-house design, engineering and manufacturing capability, we are able to customize any component and continuously answer the highest demanding requirements set by our exclusive clients.

**PHILOSOPHY**

Driven by quality and performance we push the limits of building equipment for super yachts and tenders. We use state of the art technology in materials and manufacturing to ensure our products are always of the highest quality. We believe time and care lead to the best end result and Xquip is very determined about all product details.

At Xquip we believe that close collaboration with our clients allows us to make our quality products fit seamlessly to their extravagant lifestyle.

**DURABLE**

Carbon fibre has a great fatigue strength and is highly corrosion resistant. Being engineered and built to endure the toughest conditions our products are everlasting.

**LIGHT**

Pre-impregnated carbon fibre technology allows Xquip to produce ultra lightweight components in comparison to their metal alternatives available on the market, whilst always achieving impressive material properties.

**FULL CARBON**

We guarantee the use of high quality carbon fibre in all our products. All Xquip products benefit from years of high quality craftsmanship and it’s outstanding material properties.
Xquip’s carbon fibre fenders are manufactured using autoclave technology to produce the highest strength to weight ratio possible. This makes each fender product extremely lightweight compared to stainless steel or aluminum alternatives. The fender is easy to handle and placing it on the deck from now on can be a one-person job!
CLEAT OPTIONS
Xquip offers various integrated and flush cleat options to secure your tender. Some of the surface finish options entail polished steel, brushed aluminium or anodized.

CUSTOM DECK FITTING
We offer state-of-the-art stainless steel deck fittings that match your deck layout.

PADDED STORAGE BAG
Order your fender with a custom made padded storage bag.
**DUTY FENDER THAT KEEPS VESSELS UP TO 8 TONS SAFELY ALONGSIDE ANY YACHT.**

A solution is designed that is both strong and aesthetically appealing. Two integrated carbon handles help passengers securely boarding the yacht as well as easily transport the fender.

A unique design is extended to the bottom of the fender protecting both your teak deck and the fender.

**OPTIONAL LIGHTING**

We can integrate LED lighting in your fender handles to improve operations at night and to make them look even more characteristic.

---

**SPECIALY FOR HARD TENDERS THE TURNING ROLLERS MINIMIZE FRICTION DURING MOORING**

The ROLL fender utilizes the minimalistic design of the ESSENTIAL with the addition of rollers. The number and length of the rollers is chosen on your mooring situation.
THE ESSENTIAL FENDER IS THE MORE FLEXIBLE VERSION OF OUR X1 FENDER. WE OFFER THE ESSENTIAL RANGING FROM BASIC TO A VARIETY OF CUSTOMIZATION OPTIONS.

On the essential Fender, the diagonal support beam is removed to achieve a cleaner look on deck. Even without this support it is still capable of handling vessels up to 9 ton.

BASIC
The essential basic is all you need to keep your tender safely moored alongside the yacht. We offer the basic with a flat profile PU coated bumper at the front and handle in the backside. The bottom is trimmed to match the height of your platform.

EXPANDED
The essential expanded comes with a variety of extra options such as a curved 3D shaped bumper and high gloss SS grab handle.

We can adjust the lengths of all 3 arms to create just right size.
WE CAN DELIVER FENDERS THAT ‘FOLLOW’ THE LINES OF A TRANSOM OR PLATFORM IN A TOTAL CUSTOM DESIGN

Considering the custom-level of this product every custom requires a unique mold based on the lines of the yacht and therefore this product is always 100% tailor made.

All custom fenders are equipped with our standard 32mm deck-fitting and M12 knob. A 16mm hull pin can be added for extra support.
TRANSOM FENDERS

WE OFFER OUR TRANSOM FENDERS IN SOLID FOAM CORE OR AS INFLATABLE FOR MAXIMUM STORAGE CONVENIENCE.

We can deliver these fenders in any size and thickness depending on your specific usage requirements. The solid version is made from solid closed cell polyethylene foam covered with Hypalon fabric. Hypalon fabric is tear resistant, has great mechanical resistance and comes in the color of your choice.

The neoprene in the fabric provides fire/heat resistance and also seals the fabric to make sure it is air tight.

FORMABILITY

We use a 3D scanner to get an exact 3D model of your transom shape. The foam core fender can then be formed to sit right onto the shape of your transom. An initial estimate of price can normally be produced on receipt of a sketch with measurements.
Each ladder is manufactured entirely from carbon fiber making it very strong and durable to last for the next decades. The ladder is lightweight and foldable, therefore very user friendly. Available in clear coated carbon look or painted in the color of your yacht.

**DECK FITTINGS**
We can deliver our ladders with custom deck fittings that fit your yacht and taste.
Characterized by its open tree design makes it superior for diving and snorkeling purposes compared to conventional H-style ladders. Divers can easily climb them with flippers on. For more convenience, the ladder steps have a wide and extra-long standing surface for stable climbing in rolling seas.

STAIRCASE OPTIONS
1. Clear coated carbon fiber
2. Non-skid (anti slip)
3. Teak

STORAGE
We offer padded stow bags and/or wall mounts to store your ladder.

DECK FITTINGS
We deliver our ladders with custom deck fittings that fit your yacht and taste.
DUE TO LIGHTWEIGHT CARBON WE CAN REALIZE A FULL SIZED REMOVABLE STAIRCASE THAT CAN BE INSTALLED BY TWO PEOPLE IN SECONDS

Water excess from your swimming platform has never been so easy. Grabrails, a gentle 30° angle and a standing platform all contribute to comfortable boarding.

CUSTOM FITTINGS

From 32mm deck fittings to hull connections for extra stability, we will help with the fitting design that best suits your yacht's deck layout.

HOOK-ON STAIRS

| WEIGHT | 58kg |
| LENGTH | 3.2m |
| ANGLE  | 30°  |
PILOT LADDER

THE XQUIP PILOT LADDER IS A VERY ROBUST AND LIGHTWEIGHT, THAT COMPLIES WITH SOLAS REQUIREMENTS.

The challenge is to create lightweight ladders that allows a 15 step ladder to be effortlessly handled by a single crew-member.

Each step is clamped onto the dyneema rope using fiber reinforced plastic clamps. Steps can simply be replaced as each step can be slid of the clamps individually.

Storage of the ladder is simple as the spreader bars can be disconnected, allowing for the ladder to be rolled up in a small package.

EASY SIDE BOARDING LADDER

Our boarding ladder is characterized by it's lightweight and easy storage capabilities. You can choose between a 2, 3 or 4 step set-up depending on your specific situation.

The steps have a monocoque design as it comes out of the mold as one piece. This optimizes the strength and stability of the product which adds to the feeling of safety while using it.

The ladder is attached on the edge of the deck and is gently supported on the side of the yacht by soft rubber, thereby preventing damage to the paint.

The ladder is effortlessly disassembled allowing for compact storage.
XQUIP’S SUN AWNING SYSTEM IS AN ELEGANT AND FLEXIBLE SOLUTION TO PROVIDE SHADING ON-BOARD ANY SUPERYACHT.

Based on your wishes, custom solutions are designed according to the unique deck layout in order to optimize the comfort and onboard experience for your passengers.

The sun awning support structures consist of poles that are pre-impregnated, autoclaved carbon fiber, a key feature of any Xquip product, making them highly durable and lightweight.

Depending on the size of the awning solution and your deck layout, Xquip offers a range of carbon fiber pole diameters from 60 to 140mm.

For more information please consult our website or contact us directly.

Xquip offers carbon fiber poles with a high quality clear coat finish that distinguishes itself from other poles. The availability of various diameters and dimensions allows for a perfect fit in terms of style or available mounting space on board.
XQUIP POLES AND AWNINGS CAN BE FULLY CUSTOMIZED TO FIT ANY YACHT’S ARCHITECTURE AND ACHIEVE THE DESIRED SHADING.

TENSIONING SYSTEMS
We offer 2 tensioning systems. One with manually operated block and tackle system (upto 1/6 purchase) and the other with a gear system that is operated with a drill (upto 1/12 purchase).

INSTALLATION OPTIONS
Depending on the yacht’s deck layout and construction, Xquip supplies the matching deck fittings and brackets. Whether its a pole size fitting or a small profile screw-on fitting.

CURVED
We can also do custom curved pole solutions. Ask us for the possibilities.
By integrating high quality speaker or custom ambient lights, a functional and luxury atmosphere can be created that provides passengers an even greater leisure experience.

Upon request, a speakers system or ambient lights can be added that can be attached on various awning poles.

Our lights are IP68 watertight and dimmable.

**LIGHTS & SPEAKERS**

**INDUCTION CHARGING**

We can provide two 100% watertight induction charging options. one is a dedicated charging/storage pole (below) while the other is a charging disk (left corner) that snaps onto the backside with a magnet.

**STRONG MAGNETS**

Neodymium magnets inside the light make for a clean connection.

**BLUE LED’S INDICATE LIGHTS ARE CHARGING..**
EASY & FUN

GAME COURTS

TRANSFORM ANY DECK SPACE INTO A STATE OF THE ART GAME COURT
THE XQUIP GAME COURT IS THE EASIEST AND SAFEST WAY TO TURN ANY DECK SPACE INTO A STATE-OF-THE-ART GAME COURT

Lightweight carbon fiber poles are designed to fit the existing deck fittings of the yacht’s railing. Besides the fundamental pole and net construction we offer a complete range of other game court accessories to complement any deck lay-out such as; baskets, carbon fiber goals and artificial grass. Additional speakers and light are optional to install in the corner poles. Installation of the lightweight equipment is quick and simple, and can be done by two people only.

LED LIGHTING MASTS
Each light bar gives 9000 lumen of light under a 70 degree wide angle. Single or double rigs are possible depending on the desired lighting plan.

CUSTOM DECK FITTINGS
We design custom deck fittings so they fit into your current railing deck structure.

CARBON GAME EQUIPMENT
We can design and make carbon fiber game equipment to realise a total game court experience.

TELESCOPIC LIGHT MASTS & CUSTOM LIGHTING PLAN
To extend your play time we can add multiple LED light bars on corner masts. The top part is hoisted upwards to a height of about 6 meters.
XQUIP RAILINGS ARE AMONG THE LIGHTEST REMOVABLE SUPER YACHT RAILINGS IN THE WORLD AND A GREAT ADDITION TO ANY DECK LAYOUT

It is the combination of the structural strength and refined looks of carbon fiber that really makes this an eye catcher. Our standard tube railing weighs only 950 grams and yet is extremely strong. The low weight increases the usability and decreases installation time whilst the corrosion resistant carbon fiber means these railings will last for decades.

The Xquip railing designs are fully customizable to your wishes. We can deliver custom railings to match any superyacht style and geometry.
INTEGRATED LIGHTING
On request we can equip the railings with integrated lighting that elegantly illuminates the deck.

MATCHING DECK FITTINGS
We provide various customized deck fittings with the railings that are designed to fit the specific deck layout and construction of any yacht.

CUSTOM WIDTH
The width of the railing is adjusted to your ship's deck fitting layout.

XQUIP OFFERS A VARIETY OF DESIGNS THAT BEST SUITS THE STYLE OF YOUR YACHT
The railing on a yacht should not only be safe but must contribute to the aesthetics of it. Together we can design & realise a matching solution that complements the style of your yacht.
SAFE & ELEGANT WHIPS

KEEP YOUR TENDER SAFELY ALONGSIDE THE YACHT
XQUIP’S CARBON FIBER WHIPS ARE THE SOLUTION TO KEEP YOUR TENDER SAFELY ALONGSIDE THE YACHT WHILST AT ANCHOR.

The lightweight, prepreg carbon fibre whips are easily installed by a single crewmember into a custom deck fitting designed exclusively for the yacht’s requirements. Alternatively, whip mountings can be integrated into our fender hooks for a complete mooring solution.

Internal line routing through the whip minimizes dangling.

PREMIUM HARDWARE
All are whips are delivered with premium hardware parts with excellent durability and usability.
STYLISH & SAFE

GANGWAYS

THE ULTIMATE EXPERIENCE STARTS WITH THE FIRST STEP ON YOUR YACHT
The Xquip gangway is a strong carbon gangway for easy access to your yacht. It is elegantly curved and offers maximum comfort with its extra wide platform and non-slip teak. Custom fittings make fitting and dismantling a breeze.
FENDER HOOKS

CUSTOMIZED AND HANDMADE TO FIT YOUR CAP RAIL OR BULWARK PROFILE

Xquip’s fender hooks protect varnished and painted rails while eliminating line abrasion of the fender lines.

At its core carbon fiber generates stiffness and strength while keeping it very light compared to steel or aluminium alternatives.

3D TECHNIQUES

We use advanced techniques like 3D scanning and 3D printing to get a perfect fit between hook and your rail or bulwark. Ask us for the possibilities on your yacht.

WE OFFER VARIOUS MATERIAL OPTIONS TO PERFECTLY TUNE IN WITH THE MOTHERSHIP’S STYLE

INFLATABLE FENDERS

OUR INFLATABLES ARE MADE OF HEAVY DUTY HYPALON COATED FABRIC

Any size is possible and we deliver in various colors. The Hypalon is highly resistant to UV, oil, diesel and petrol and they are warranted for 5 years on the fabric and air tight seams.

Equipped with premium air valves the fenders are quickly inflated/deflated with the a compressor.

THE FENDERS ARE OPTIONALLY BRANDED TO MATCH THE MOTHERSHIP
Xquip designs and manufactures user-friendly, full carbon chocks with great aesthetics to match boats and tenders in any shape or size. The autoclaved pre-impregnated carbon offers a lot of advantages as it is strong, lightweight and durable. Where metal will eventually fatigue and/or corrode, carbon will handle an infinite cycle of loads whilst staying corrosion free.

Because each superyacht has a unique tender and crane arrangement, each spreader bar by Xquip is particularly designed and engineered to match the loadcase and dimensions.

SERVED CLIENTS
- MY Dream
- MY Tatoosh
- MY Global
- MY Pelorus
This Premium Boat Hook is made from a 32mm diameter carbon fibre tube with a quality clear coat finish. It comes complete with an high gloss stainless steel base and head piece. An exceptional leather handgrip in the colour of your choice completes this work of art.

This Premium Boat hook can be delivered in any length. This product is highly functional and is the perfect finishing touch to any superyacht.
